# Sign up today for a FREE Oral Health Training for your Pediatric Practice!

- ✓ Improve the Health of Your Patients
- ✓ Meet Bright Futures Recommendations
- ✓ Increase Revenue

Tooth decay is the most common chronic infectious disease of childhood – five times more common than asthma. 44% of children will have at least one cavity by Kindergarten. Today, both private and Medicaid insurance coverage includes preventive oral health services for children. Is your practice taking advantage?

The PA AAP Oral Health in Your Office training provides information around integrating oral health screening, risk assessment and fluoride varnish application during pediatric well visits. Support around reimbursement for fluoride varnish application for children under 5 is also included. This free training is conducted at your location or virtually for your entire office staff by peer professionals. Educational materials and fluoride varnish samples are provided and the training offers 1.5 CME/CEU credit for participants.

**To request a FREE, on-site or virtual presentation, complete and form below and return via email at [hthc@paaap.org](mailto:hthc@paaap.org) or fax to 484-446-3255.**
